Internet of Things  
Acoustic Ecology  
Creative AI

# AHRC Sensing the Forest

## Research question

The overarching research question is, how can the use of **artistic and community science research methods** help to **inform and educate people about climate change?**

In particular, **what can we learn from using artistic and community science research methods** employing the **Internet of Things (IoT)**, **Acoustic Ecology** and **Creative Artificial Intelligence (AI)** in relation to **monitoring forest behaviour** and **raising awareness about climate change?**

# sensing the forest

The team in a nutshell...

**Dr Matthew  
Wilkinson (CI)**  
Senior Climate  
Scientist, Forest  
Research

**Dr Georgios  
Xenakis (CI)**  
Senior Climate  
Scientist, Forest  
Research

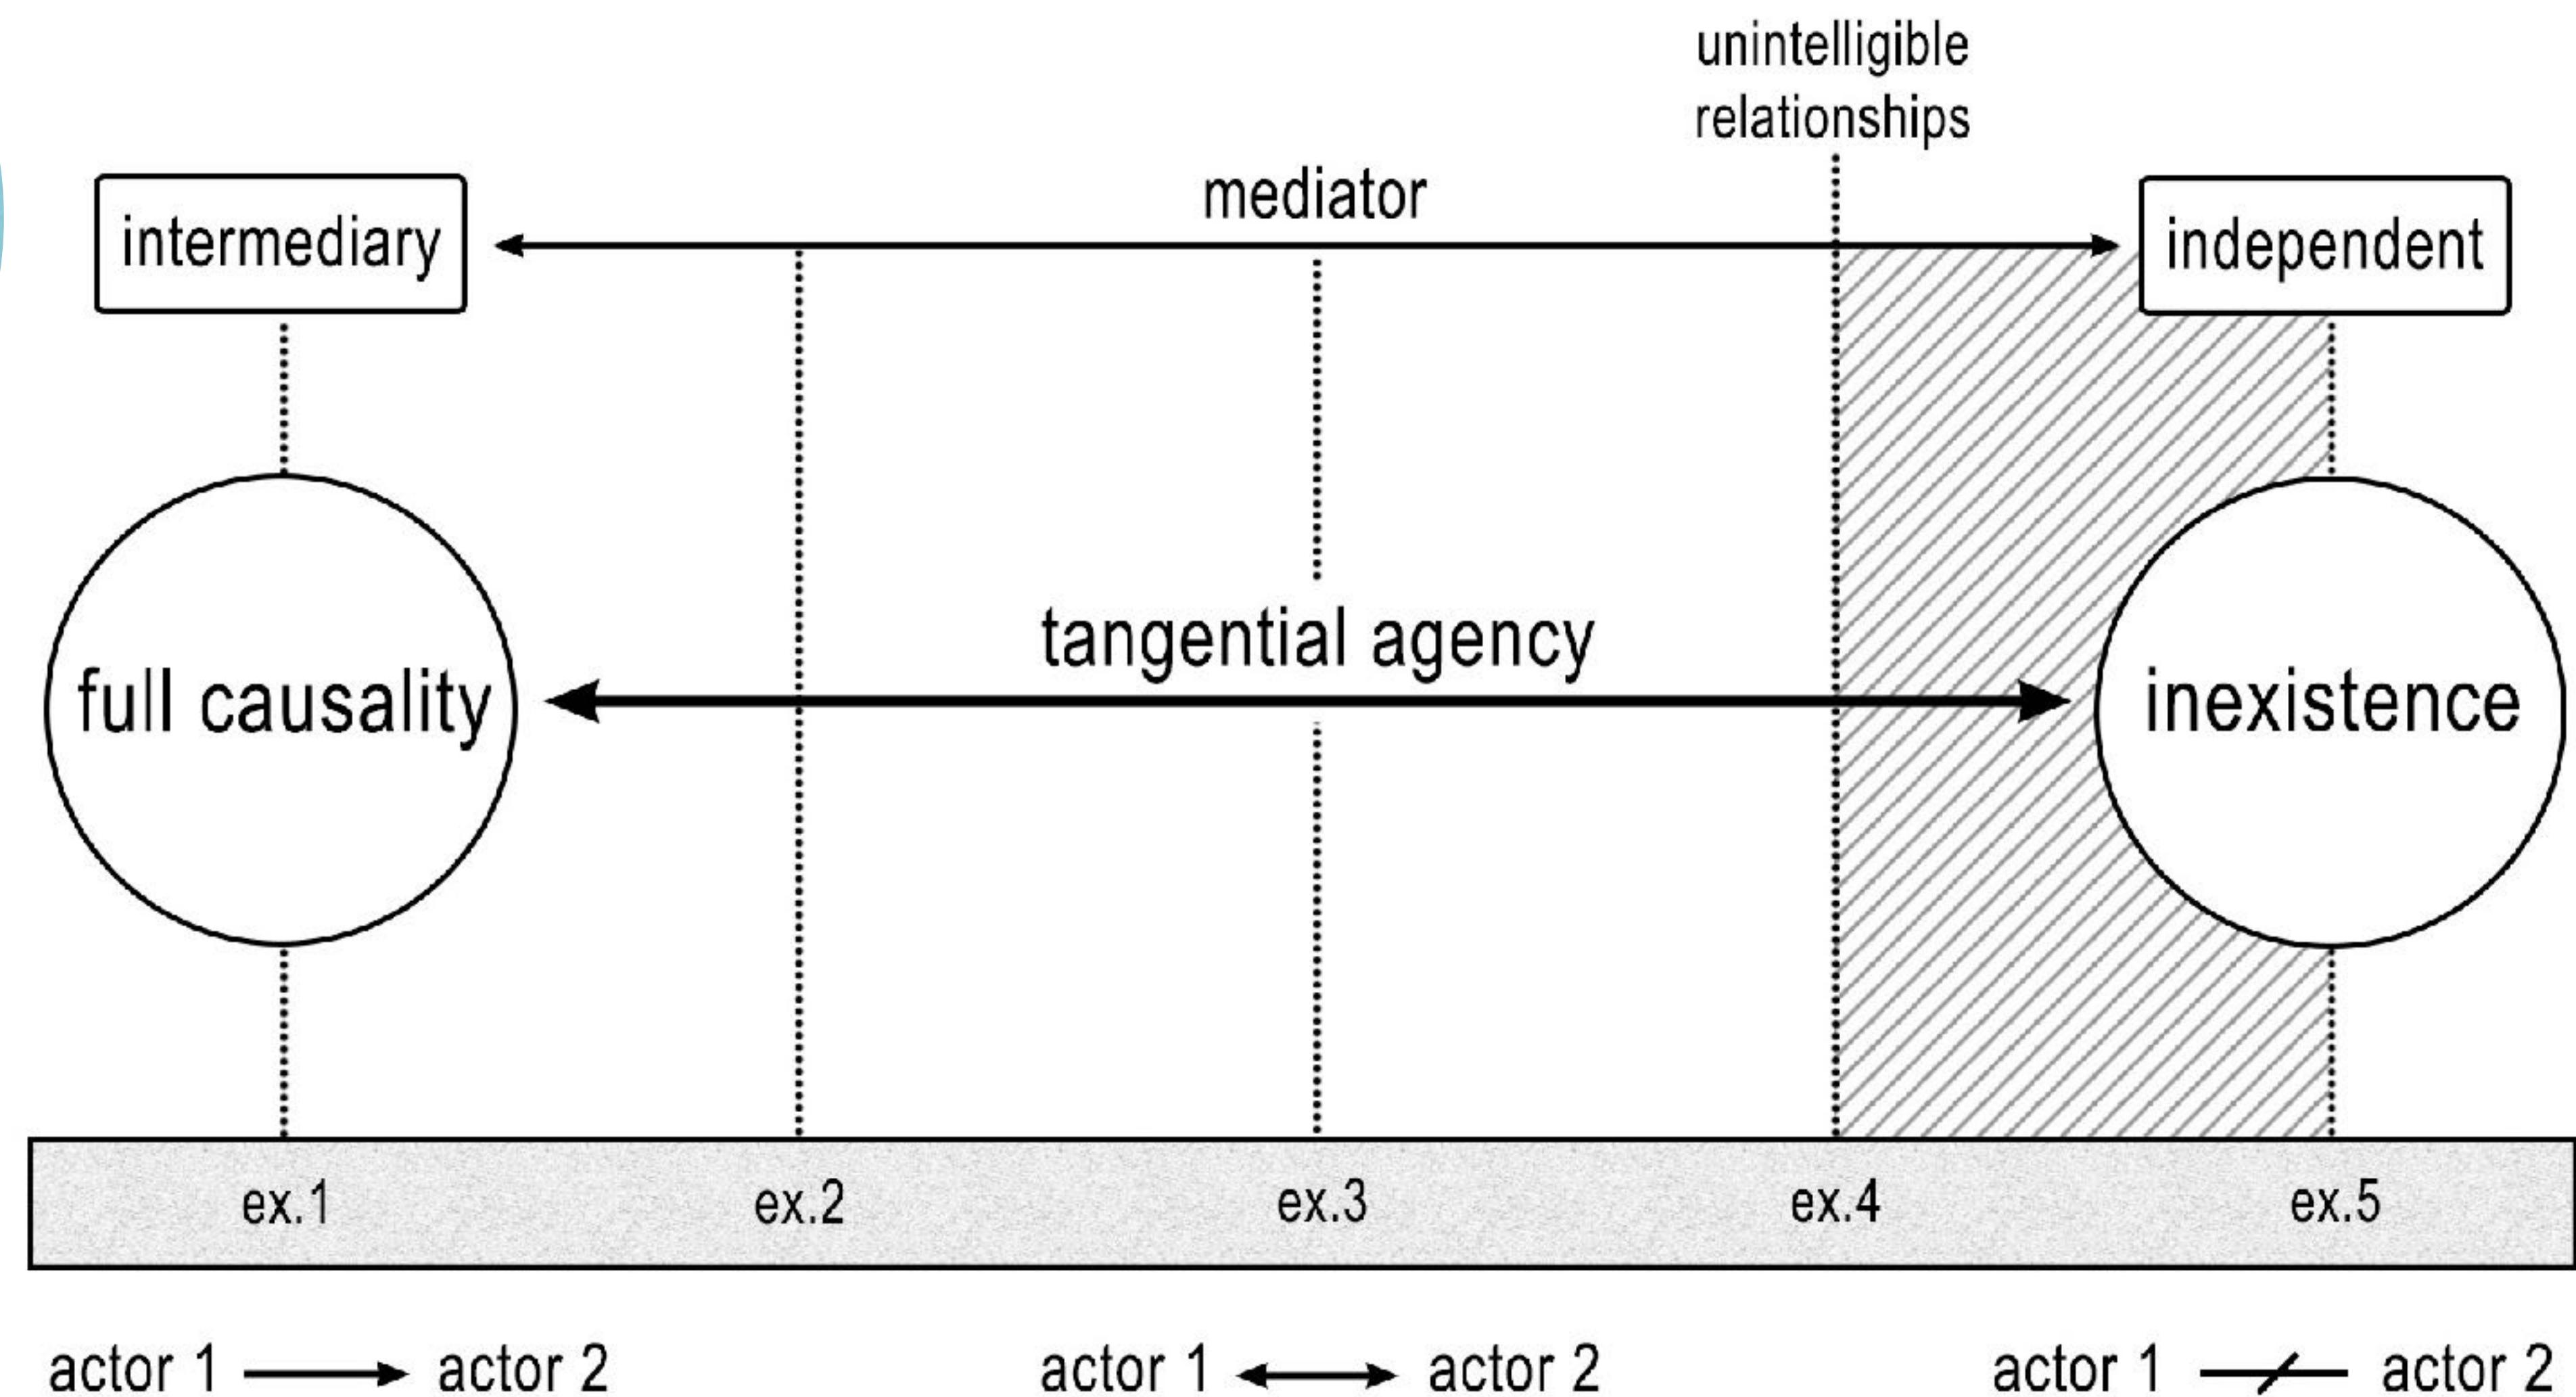

**Dr Peter  
Batchelor (CI)**  
Senior Lecturer in  
Music,  
Technology and  
Innovation,  
De Montfort  
University

**Dr Luigi Marino**  
Research Fellow  
in Sound and  
Music Computing

**Hazel Stone**  
National Curator  
of Contemporary  
Art, Forestry  
England

**Nick Wardlaw**  
Recreation  
Manager, Forestry  
England

**Danielle Grimsey**  
Site Manager,  
Alice Holt,  
Forestry England

**Max Gravestock**  
Site Manager,  
Alice Holt,  
Forestry England

**Forestry England**

**Dr Krishna  
Nama  
Manjunatha (CI)**  
Senior Lecturer in  
Micro and Nano  
Electronics, De  
Montfort  
University

**Ashok  
Karavadra**  
Senior  
Technician, De  
Montfort  
University

**Dr Anna Xambó  
(PI)**  
Senior Lecturer in  
Music and Audio  
Technology, DMU

# Advisory Board

**Prof Mark Plumley**  
Professor of Signal  
Processing,  
EPSRC Fellow in  
“AI for Sound”,  
University of Surrey

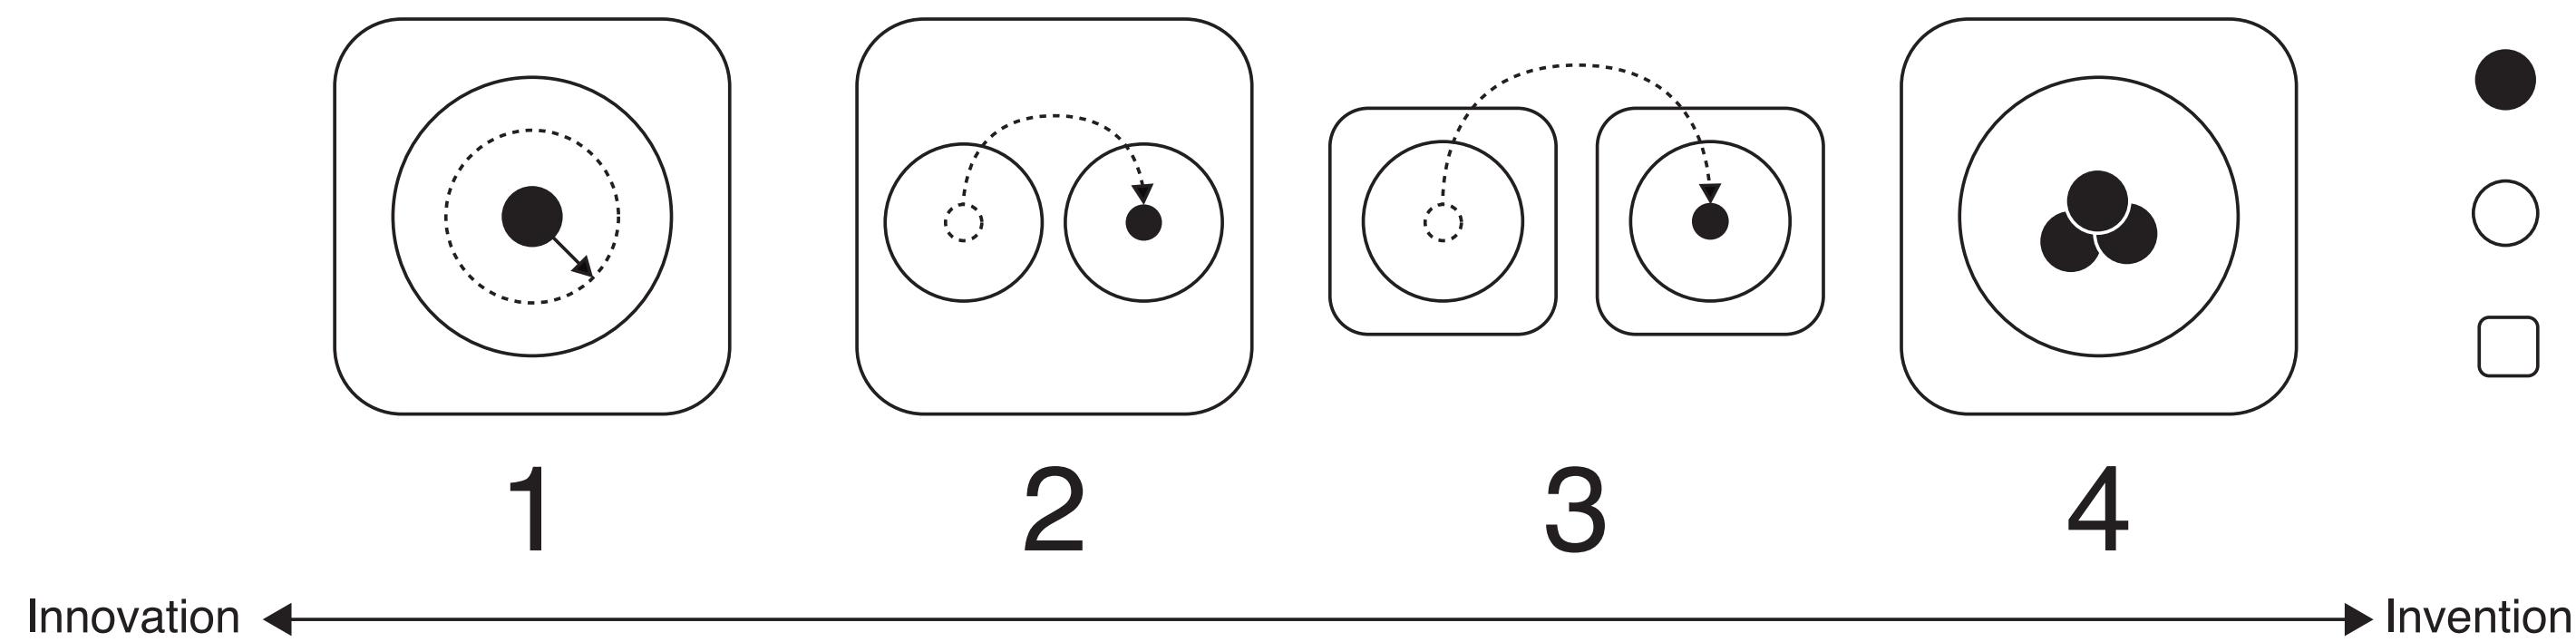

**Louise Fedotov-  
Clements**  
Director of Photoworks,  
National Curator at  
Forestry England

**Prof Leigh Landy**  
Professor of Contemporary  
Music,  
Director of MTI<sup>2</sup>,  
De Montfort University

# Interdisciplinary methods

## In the search for methodological innovation

**EXPANSION**  
method  
original  
context  
discipline

**RESITUATE**  
existing  
method  
new context  
original  
discipline

**TRANSFER**  
existing  
method  
new discipline  
adapted,  
remixed

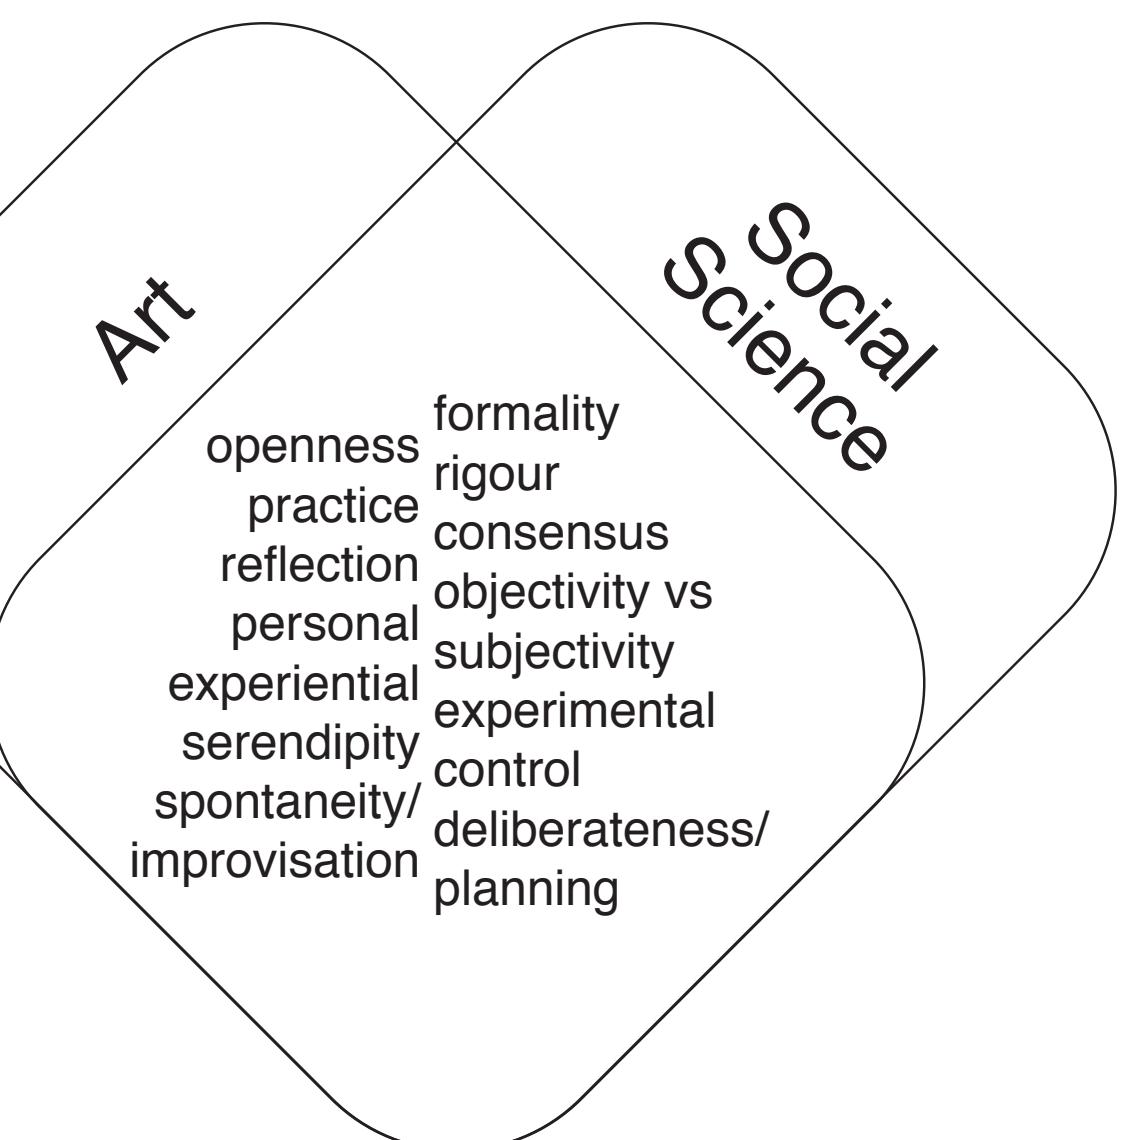

**GENERATION**  
new method  
inter-  
disciplinary  
mixing

- Method
- Context
- Discipline

openness  
practice  
reflection  
personal  
experiential  
serendipity  
spontaneity/  
improvisation

Art      Social  
Science

formality  
rigour  
consensus  
objectivity vs  
subjectivity  
experimental  
control  
deliberateness/  
planning

### \*\*ONLINE SEMINAR TALKS\*\*

The AHRC-funded research project “Sensing the Forest - Let the Forest Speak using the Internet of Things, Acoustic Ecology and Creative AI” presents a series of 3 fortnightly online seminar talks with 6 experts related to artistic, social and scientific interventions in the forest or other natural landscapes with a special focus on acoustic phenomena. All welcome.

# Prototype WP2

Dedicated web app (analysis, visualisation, sonification)

sensing  
the forest↑

# Summary

- Discussed the meaning of artistic intervention when working with nature.
- Discussed the potential of combining and reimagining research methods when working in inter-multidisciplinary teams.
- Showcased the present and future actions of the AHRC Sensing the Forest project.
